## EDUCATION

---

- **University of British Columbia (UBC)**

*Bachelor of Data Science*

*Anticipated in May 2029*

Vancouver, BC

- Relevant Courses: DSCI 100, CPSC 121, CPSC 210, CPSC 110, MATH 200

## PROJECTS

---

- **BC Wildfire & Air Quality Analytics | R, Quarto, GitHub**

2026

- Integrated and audited 2022-2024 Canadian wildfire and BC air quality data, engineering spatial and temporal features to analyze relationships between recent, near wildfire activity and daily PM2.5 using EDA, KNN classification, KNN/linear regression, and K-means clustering
- Built and published a reproducible Quarto learning module using real project errors to show common mistakes and teach debugging, data validation and critical auditing of AI-assisted code

- **Vancouver Crime Analytics | Python, pandas, Jupyter**

2026

- Analyzed Vancouver open crime data to compare neighbourhood-level crime patterns and offence composition, cleaning and building reproducible visualizations to show trends (working on)

## WORK EXPERIENCE

---

- **Python Instructor (Paid)**

*October 2024 - January 2025*

*UTG Academy*

- Taught Basic-Intermediate Python programming to 4 students (9-14) for 2 hours weekly; each individual completed one project as a curriculum, added personal features, and began an independent project
- Balanced students' ideas with the curriculum and gave constructive, actionable feedback to maintain their motivation

- **Robotics Instructor (Paid)**

*September 2023 - February 2024*

*UTG Academy*

- Taught 8-14 VEX Robotics to 12 students for 8 hours weekly, providing hands-on design, build, and coding lessons
- Transformed students' ideas into achievable designs and adapted demonstrations and feedback to engage

## LEADERSHIP EXPERIENCE

---

- **FTC Team Lead**

*September 2024 - March 2025*

*PMSS Robotics Club Executive | Port Moody Robotics Team 24232 Lead*

- Recruited, onboarded, and led 11-member team of students new to robotics; taught design/CAD and Java programming and established build/code standards
- Managed \$2000 budget and coordinated outreach workshops, including a STEM workshop in an elementary school of 100+ students
- Retained most members with several later advancing into executive roles

## SKILLS

---

- **Data Analysis:** R, Python
- **Tools:** Quarto, Git/GitHub, VS Code, Microsoft Excel
- **Tools:** Java, C, TypeScript, HTML/CSS
- **Languages:** Korean (fluent), Japanese (intermediate)
